

Kimberly (Pei-Chun) Chen

UX Designer · Product Designer · UX Researcher

Tempe, AZ · 602-341-7456 · kimberlychen122489@gmail.com

SUMMARY

UX practitioner with a Master's in User Experience and a background spanning medical librarianship and startup QA. Drawn to user research and information architecture, with hands-on experience conducting usability studies and translating findings into interface decisions. Comfortable with HTML, CSS, and JavaScript for prototyping and engineering collaboration. Seeking full-time UX Research, Product Design, or UX roles in the U.S., with particular interest in healthcare, enterprise, and other information-rich domains.

EXPERIENCE

Jul – Dec 2024	Librarian <i>Taipei Veterans General Hospital · Taipei, Taiwan</i> - Redesigned the SSO login interface for a hospital database used daily by 50+ medical staff; surfaced login rules directly in the UI, reducing support inquiries from clinical users. - Restructured the medical library website's information architecture and taxonomies to improve findability of digital journals and clinical resources. - Drew on daily interactions at the circulation desk to identify recurring pain points across search, access, and resource borrowing workflows, documenting findings to inform website and service improvements.
Jan 2023 – Mar 2024	Manual QA Engineer <i>WRCD · New Taipei, Taiwan</i> - Performed manual testing for a consumer mobile app covering pet food subscription, health tracking, and e-commerce features; flagged usability issues across UI flows, interaction logic, and animations alongside functional bugs. - Authored test scenarios covering real user paths and edge cases, surfacing usability issues that purely functional testing would have missed. - Worked with PMs and engineers to communicate findings and prioritize fixes, helping reduce recurring bug tickets and user flow issues across releases.

SELECTED PROJECTS

Sep 2025	ASU Shuttle Tracking Website Redesign <i>Solo Designer & Researcher</i> - Conducted mixed-methods research (interviews, surveys, contextual inquiry) and delivered user flows, wireframes, and a high-fidelity Figma prototype. - Validated through usability testing, achieving a SUS score of 83.75; documented the process in a case study.
2025	Music Festival App + Staff Admin Platform <i>Solo Designer</i> - Designed a dual-platform event management system: attendee app (promotion, ticketing, event details) and staff dashboard (managing vendors, acts, festival info). - Grounded decisions in personas, user journey maps, and competitive analysis across both audiences. - Built a design system (typography, color, components, interaction patterns) and delivered high-fidelity Figma prototypes for both platforms.

EDUCATION

Jan 2025 – May 2026	M.S., User Experience <i>Arizona State University · GPA 4.0 / 4.0</i> <i>Relevant coursework:</i> User Experience, Human Systems Engineering, Wireframe and Prototype, Technical Communication.
Sep 2019 – May 2023	B.L.A., Library and Information Science <i>Tamkang University, Taiwan · GPA 3.77 / 4.0 · Top 32% of Department</i> <i>Relevant coursework:</i> Information Architecture, Needs Analysis, Information Storage and Retrieval, Information Visualization.

SKILLS

Methods: User Research · Interviews · Surveys · Usability Testing · Information Architecture · Card Sorting · Taxonomy Development · Metadata · Controlled Vocabularies · Competitive Analysis · Heuristic Evaluation · Affinity Mapping

Tools: Figma · FigJam · Notion (databases, project management)

Front-end: HTML · CSS · JavaScript · Claude Code (AI-assisted development) · Git / GitHub

Languages: English · Mandarin (Native)
