

KIMBERLY (PEI-CHUN) CHEN

UX Designer • Product Designer • UX Researcher

Tempe, AZ • 602-341-7456 • kimberlychen122489@gmail.com • [LinkedIn](#) • [Portfolio](#)

UX designer combining a Master's in User Experience with a foundation in Library and Information Science. Specialized in information architecture, user research, and usability testing, translating user observations into measurable interface improvements across healthcare and consumer mobile products. Working knowledge of HTML, CSS, and JavaScript supports close collaboration with engineering teams. Seeking full-time UX, Product Design, or UX Research roles in the U.S.

EDUCATION

Master of Science, User Experience

Jan 2025 – May 2026

Arizona State University • GPA: 4.0

Relevant coursework: User Research, Usability Testing, UX Strategy, Interaction Design, Prototyping, IA

Bachelor of Liberal Arts, Library and Information Science

Sep 2019 – May 2023

Tamkang University, Taiwan • GPA: 3.77

EXPERIENCE

Librarian (UX-focused)

Jul 2024 – Dec 2024

Taipei Veterans General Hospital • Taipei, Taiwan

- Redesigned the hospital database SSO login interface used daily by 50+ medical staff, partnering with internal IT teams to translate user needs into system improvements that reduced friction in time-sensitive clinical workflows.
- Restructured the medical library website's information architecture and developed structured taxonomies, improving discoverability of digital journals and clinical resources.
- Conducted ongoing contextual user observation at the circulation desk to identify pain points across search, access, and resource borrowing workflows.

Manual QA Engineer (UX-driven Testing)

Jan 2023 – Mar 2024

WRCD • Taipei, Taiwan

- Conducted user-oriented manual testing for a consumer mobile app spanning pet food subscription, health tracking, and e-commerce, identifying usability issues across UI, app logic, and animation flows.
- Authored test scenarios covering real user paths and edge cases, surfacing usability issues that may have been missed by purely functional testing.
- Collaborated with PMs and engineers to communicate findings and prioritize fixes, contributing to a measurable reduction in bugs and user flow errors across releases.

SELECTED PROJECTS

ASU Shuttle Tracking Website Redesign

Sep 2025

Course Project • Solo Designer & Researcher

- Led an end-to-end redesign serving thousands of students and faculty: conducted mixed-methods research (interviews, surveys, contextual inquiry), then translated insights into user flows, wireframes, and a high-fidelity Figma prototype.
- Validated the redesign through usability testing with UX metrics including the System Usability Scale (SUS) and Time on Task, and documented the full process in a case study.

Music Festival App + Staff Admin Platform

2025

Course Project • Solo Designer

- Designed a dual-platform experience: an attendee-facing mobile app and a staff-facing admin dashboard for festival operations, covering core flows for both end users and internal operators.
- Built a cohesive design system spanning both platforms (typography, color, components, interaction patterns) to ensure consistency at scale, and delivered a complete high-fidelity Figma prototype.

SKILLS

Methods User Research • Interviews • Surveys • Usability Testing (SUS, Time on Task) • Information Architecture • User Flows • Heuristic Evaluation • UX Strategy

Tools Figma • FigJam • Prototyping • Affinity Mapping • Notion

Front-end (Familiar) HTML • CSS • JavaScript

Languages English • Mandarin (Native)
